3. by far
4. such a far
5. such far

Situation: At the pet store

Taylor: Oh! _____(3)_____. What do you think?
Ryan: I think I'd rather get a dog. Dogs are more loyal than cats.
Taylor: Yes, but they're so much work! Would you be willing to walk it every single day? And clean up after it?
Ryan: Hmm. _____(4)_____. What about a bird? Or a fish?
Taylor: We'd have to invest a lot of money in a cage or a fish tank.
And I don't really know how to take care of a bird or a fish!
Ryan: Well, we're obviously not ready to get a pet yet.
Taylor: Yeah, you're right. Let's go grab some coffee and talk about it.

Situation: Fizer and Mario discusses about their study. (Items 6 - 10)

Fizer: Hi there, Mario. How are you going with your American studies tutorial paper?
Mario: Oh good. I've finished it actually.
Fizer: Lucky you. _____(6)_____. I'm still trying to find an interesting topic.
Mario: Well…_____(7)_____, I decided to look at the history of banana growing in the US.
Fizer: Banana growing! Fascinating, I'm sure!
Mario: Well…it's not as boring as you'd think. And I wanted to tie it in to the work I've been doing on primary industries and the economy.
Fizer: I suppose you are going to tell me the whole history of banana growing now, aren't you?
Mario: Well, it'd be a good practice run for my tutorial next week. I'll do the same for you _____(8)_____.
Fizer: OK. _____(9)_____. So, where were these bananas first domesticated?
Mario: According to my research, the Cavendish banana, which is a type of banana and the first type to be cultivated here, actually originated in China but they had a fairly roundabout route before they got to the US.
Fizer: _____(10)_____they didn't go straight from China to the US.?
Mario: No, they didn't. It seems that in 1826, bananas were taken from South China to England.
Fizer: Well, this seems to be a knowledgeable conversation. Thank you for sharing.
Mario: With all pleasure.

Part II: Reading Comprehension (Items 11 – 25)

Skyscraper

The most necessary invention to make a tall building, or a skyscraper, was the elevator shaft. In the mid 1800s, the first passenger elevator was installed in a New York department store. At the time, it was very difficult to conveniently move thousands of people up and down a building that was over 20 stories tall. Without elevators, tall buildings might never have been built.

The first step to constructing a skyscraper is digging a big foundation hole. When the Petronas Twin Towers were built in Kuala Lumpur, Malaysia, engineers had to shove massive concrete pillars 60~120 meters into the Earth's bedrock layer. The second step to building a skyscraper is making its steel skeleton. This is just like the frame of a car. Strong iron or metal beams are welded to create long vertical columns. At each floor level, these vertical columns are connected to horizontal beams.

The third step also involves building the steel skeleton. This steel frame has outer walls (or curtain walls) that support almost all the weight of the building. The weight from all the floors gets transferred directly to the vertical columns. This sends forces through the steel skeleton down into the building's base. In modern skyscrapers, these exterior curtain walls are made almost entirely of glass which gives more floor space for tenants to live or work. Once the skeleton has been built, the fourth step is much easier. The floors are then added to a new skyscraper, often one to two a day. A fifth and final step is stabilizing the skyscraper. Some buildings have huge weights controlled by computers. The weights glide back and forth in the opposite direction than that which the building moves during an earthquake or high winds.

(Cited from Brady Fotheringham)

11. What happens during the second step of building a skyscraper?

1. Elevator shaft frames are installed on every floor.
2. The building's base is constructed.
3. The exterior of the steel skeleton is built.
4. The floors are added to the building.
5. The horizontal beams are created first.

12. According to the passage, what was the breakthrough needed to build a skyscraper?

1. Elevators shaft
2. Concrete pillars
3. Modern construction engineers
4. Lightweight glass panels
5. Computer control

13. What benefit occurs from using exterior curtain walls?

1. The building design is more attractive.
2. Curtain walls support a lot of the weight.
3. Using curtain walls decreases the cost of building.
4. Curtain walls support electrical cables.
5. Curtain walls make the building look more beautiful.

Learning

One of the major processes that takes place in schools, of course, is that students learn. When they graduate from high school, many can use a computer, write essays with three-part theses, and differentiate equations. In addition to learning specific skills, they learn to think critically, to weigh evidence and to develop independent judgment. The extent to which this development takes place is related to both school and home environments. Teachers who are more open to new ideas and less authoritarian produce students who have greater intellectual flexibility and higher achievement test scores. Studies show that teachers are most demanding when they are of the same social class as their students. The greater the difference between their own social class and that of their pupils, the more rigidly they structure their classrooms and the fewer demands they place on their students.

(Cited from Grammarbank)

14. It is clear from the passage that teachers who are more open to new ideas _____.
1. produce more successful students in terms of test scores and intellectual flexibility
2. often come from a lower social class than their students
3. are more authoritarian towards students
4. discourage intellectual flexibility in schools
5. give students more homework

15. We learn from the passage that when students graduate from high school _____.
1. none of them are able to think critically
2. they can take the overall responsibility of anything
3. all of them have a good knowledge of computer usage
4. many of them have gained specific skills like writing essays and differentiating equations
5. most of them lack knowledge because of unavailability of ideal learning conditions

16. According to the text, it is true that _____.
1. teachers who are from a higher social class than their students should be hired
2. both the school and home environments greatly influence a student's achievement in school
3. it is not so difficult to constitute ideal learning conditions
4. every student can get high test scores under close supervision
5. students learn best in a rigid classroom environment

"From the sublime to the ridiculous is only a step"

17. What does this sentence mean?
1. Nothing is certain
2. A step can make life ridiculous
3. Sublime is possible by a step
4. Don't make yourself ridiculous
5. Nothing can be sublime and ridiculous

18. What is the purpose of this saying?
1. to teach
2. to command
3. to threaten
4. to advertise
5. to persuade

19. Where would we most likely see this saying?
1. in a religious text
2. on a job poster
3. in a university brochure
4. in an advertisement
5. on the variety show

Dream Jobs by Giovanni Marks

During our teens, all the pupils at my school had to have a meeting with a 'careers advisor' who only seemed to know about jobs at the local ship-building works. That was fine for some, but many of us would have liked to hear about a wider range of opportunities at that time. If only she had known about the jobs I've been researching for this article! It seems there are positions out there that are almost too good to be true.

Take, for example, the job with the title 'Ice cream flavour advisor' for ice cream manufacturer Frederick's. Imagine making and tasting ice cream for a living! From the Fredrick's website I learned that the people who do this job are all chefs and food scientists, and often go on what they call 'taste hunts' where they travel to other countries, trying new foods to get inspiration for new products. The website's home page also states that 'every ingredient deserves consideration', meaning anything from peanuts to potatoes could make it into the next flavour advisor's invention. I guess the one downside of this job could be tasting failed creations.

For those worried about the health implications of eating so much ice cream, then how about something more active? The perfect job for water sports lovers was advertised in 2015 by holiday company Travel Now. They needed a water slide tester! This involved getting into swimming gear and speeding down slides at various holiday centres around the world to check for any issues. The company was seeking applicants with strong written and verbal skills, experience in social media and a willingness to travel.

Another job that seems impossibly wonderful is one for those who dream of living on a remote island. As the caretaker of a private island in the Maldives, Simon Grainger gets to enjoy fabulous weather, fishing and boating as part of his job. However, he says that while it may sound more like an extended holiday than work, the responsibilities of the job can be very demanding. These include maintaining and repairing the island owners' property and cleaning up after storms. On top of that, being by yourself on an island means that your social life suffers. Seeing friends involves an hour's boat ride, which is never easy and sometimes impossible. Grainger warns anyone considering a job like his to be realistic about it. He explains you've got be very practical with good physical fitness, and happy in your own company. If you are this type of person, you'll do the job well and never want to go back to life on the mainland.

A fortune cookie is a moon-shaped biscuit given away in Chinese restaurants that contains a little piece of paper with a message on it. Millions of these are read every day, but few realise that people actually get paid to write the words of wisdom you find when you crack your cookie open. Daisy Cheng, president of New Asian Food in Los Angeles, used to be **one such person**. It wasn't exactly her chosen career path, it was more of a role she fell into. When the company expanded and realised they needed to update their cookie messages, she was asked to do it because her English language skills were stronger than other employees'. She found it difficult to start with, but soon she was finding inspiration everywhere, from subway signs to newspapers.

As a writer myself, I would love to create messages for fortune cookies, but I would be delighted to do any one of these amazing jobs. Listen up careers advisors!

(Cited from Cambridge Exam Booster for First and First for Schools (2017)

20. How does the writer feel about the careers advisor he met when he was younger?

1. He regrets that she was unable to help any of the teenagers.
2. He found her guidance quite useful at the time.
3. He thought it was unnecessary to see her.
4. He wishes she had been aware of a greater variety of job options.
5. He thought she had great experiences on researching.

21. It is claimed on the website for Frederick's ice cream that _____.

1. there is no food type that they will refuse to experiment with
2. they are able to make most ingredients taste good in ice cream
3. they trial every new flavour creation internationally before it goes on sale
4. no other ice cream producer has greater expertise
5. chefs and food scientists are managing the website

22. Applicants for the job of water slide tester were required by Travel Now to _____.

1. be good at communicating with people
2. have plenty of travel experience
3. have good IT qualifications
4. be very physically fit
5. have their own swimming gear

23. Grainger says about his role as caretaker on a private island that _____.

1. he is considering giving it up so he can move back to the mainland
2. it might not be the right job for everyone
3. the holiday lifestyle involved is not always enjoyable
4. the only thing that is hard about it is being alone on the island
5. the role as caretaker is always easy for him

24. What does the fifth paragraph say about Daisy Cheng getting her job as fortune cookie writer?

1. She got the job because none of her colleagues spoke any English.
2. She applied for it when the company grew and needed more people to do the job.
3. She tried to avoid doing the job at first.
4. She used her English skills to apply for the job.
5. She did not deliberately choose to do the job.

25. The phrase '**one such person**', in the fifth paragraph, refers to _____

1. someone who is a company vice president
2. someone who is from New York
3. someone who didn't know fortune cookie message writers existed
4. someone who writes the messages in fortune cookies
