รายละเอียดข้อสอบ	**ข้อสอบฉบับนี้มี 8 หน้า**	**จำนวน 50 ข้อ**	**ระยะเวลา 90 นาที**
วิธีการตอบ	**ให้ใช้ดินสอ 2B ระบายในวงกลมที่เป็นคำตอบในกระดาษคำตอบ หรือ นำโทรศัพท์มือถือมาสแกน QR Code เพื่อกรอกและยืนยันคำตอบในระบบ**		
เกณฑ์การให้คะแนน	**ส่วน Expression**	**ข้อ 1-10**	**ข้อละ 1.6 คะแนน**
(คะแนนเต็ม 100 คะแนน)	**ส่วน Reading Comprehension**	**ข้อ 11-25**	**ข้อละ 2.4 คะแนน**
	ส่วน Structure	**ข้อ 26-40**	**ข้อละ 2.2 คะแนน**
	ส่วน Vocabulary	**ข้อ 41-50**	**ข้อละ 1.5 คะแนน**

ข้อปฏิบัติในการสอบ

1. ให้ผู้เข้าสอบปฏิบัติตามระเบียบสำนักงานโครงการสอบวัดทักษะวิชาการระดับชาติ (สวช.) ภาคีเครือข่ายโรงเรียนทั่วประเทศ และสถาบันอีซี่ลิชประเทศไทย ว่าด้วยแนวทางปฏิบัติเกี่ยวกับการดำเนินการทดสอบ พ.ศ. 2560 อย่างเคร่งครัด
2. สำหรับสนามสอบปิด ให้ผู้เข้าสอบระบายคำตอบลงในกระดาษคำตอบด้วยดินสอ 2B อย่างถูกต้องและชัดเจน
3. สำหรับสนามสอบออนไลน์ เมื่อผู้เข้าสอบนำโทรศัพท์มือถือหรืออุปกรณ์อิเล็กทรอนิกส์มาแสกน QR Code เพื่อเข้าสู่แบบฟอร์มกระดาษคำตอบ กรอกหรือเลือกคำตอบให้ถูกต้องและครบถ้วน โดยเปิดกล้อง ZOOM ยืนยันตัวตนไว้จนกว่าจะยืนยันกระดาษคำตอบเสร็จ และบันทึกภาพหน้าจอเพื่อเป็นหลักฐานหลังกดส่งยืนยันคำตอบและปิดกล้อง

หากผู้เข้าสอบฝ่าฝืนข้อปฏิบัติโครงการ สวช. หรือมีการทุจริต จะมีการดำเนินการ ดังนี้

1. ไม่ประกาศผลการสอบจากการทดสอบดังกล่าว

System to Identify and Predict Smells

Developers said they had created a technology tool that can identify and re-create different smells.

The scientists built on past research to produce a brain-like technology model to create a "principal **odor** map" to identify molecules related to smells. The team said such a system can be used across many different fields, including the healthcare, food and fragrance industries.

The researchers reported that the tool can be used to help fight one of the world's biggest health problems – diseases spread through insects. They said the system can measure how effective a molecule is at keeping mosquitos away from humans.

Method to Identify Parkinson's Disease

Researchers announced a new AI method to identify Parkinson's disease – a neurological disease that harms the brain.

The system works by measuring a person's breathing patterns during sleep. A study describing the method said it can also measure the severity of disease and record its progression.

The researchers noted that early signs of Parkinson's disease are not easy to discover. Many signs, or symptoms, only appear years after the disease sets in.

But the team said its experiments showed that with just one night of sleep, the AI system was able to correctly identify Parkinson's up to 86 percent of the time. With 12 nights of data, the rate went up to 95 percent.

11. What is the best headline of these two articles?

1. Interesting AI Tools
2. Next Era of Health
3. Scientific Breakthrough
4. Life and AI
5. AI Discovery

12. Which word can best replace the word "odor" in the first article?

1. feeling
2. navigator
3. scent
4. scene
5. nasal

13. Which field is likely to benefit from these technological tools?

1. medical science
2. neurological science
3. science and technology
4. computer science
5. fragrance industry

14. How does the tool detect Parkinson's disease?

1. detecting night experiment
2. analyzing breath pattern
3. measuring the severity of disease
4. measuring the sleep hour
5. detecting signs and symptoms

Science Column

More governments increased plans to support renewable energy and reduce emissions from fossil fuels, like oil and gas, in 2022.

In India, the government plans to send $2.6 billion to support the manufacture of equipment used for solar energy.

Companies like Renew Power hope to gain from the plan. The energy company has over 100 clean energy projects across India. It has also become the world's tenth largest solar and wind energy company in 10 years.

Renew Power's chief Sumant Sinha said the government spending on renewable energy sends "a strong signal" that the country wants "to become a manufacturing location for renewable energy equipment and a global **alternative** to China..."

In August, The United States signed into law the Inflation Reduction Act. The legislation includes about $375 billion in spending over the next 10 years to support renewable energy. The law approves government support for the electric car industry and solar energy industry.

Earlier this year, the European Commission presented a plan to reduce European dependence on Russian oil and gas. It also aims to speed up the change to renewable energy.

Kingsmill Bond is an energy expert at the non-profit Rocky Mountain Institute based in the state of Colorado. He said that fossil fuel demand reached its highest point in 2019 and will at some point start to go down. Bond added that the price of renewable energy was getting closer to that of fossil fuels and in some cases it was cheaper.

IMAGINE someone throws a brick through your window. The case goes to court and the brick-thrower is convicted. But you are told you must pay for your window — and his brick. An unbelievable injustice? Yes — but that's just what Britain's newspapers face. In the New Year, the Culture Secretary must decide whether or not to implement a piece of legislation so pernicious, so illiberal, it is hard to believe Parliament ever passed it. But it did. Under Section 40 of the Crime and Courts Act, rushed into law after the Leveson Inquiry, any newspaper, from Metro to the Guardian, that refuses to join a regulator approved under the Government's Royal Charter for the Press, and is sued for libel, will be forced to pay the other side's legal costs — even if the newspaper wins.

EVEN IF YOU WIN, YOU LOSE: If this law is implemented it won't matter if an article is true, lawfully published, serves the public interest and the complaint is thrown out by the court — any newspaper not signed up to an approved regulator will face paying all the costs, every

WHO WILL EXPOSE INJUSTICE? Most of our greatest injustices are exposed not by MPs or the police, but by newspapers. The MPs' expenses scandal; the Rotherham sex grooming cover-up; the monumental failures over the murder of Stephen Lawrence — just a few of the investigations that would never

SO WHO REGULATES METRO? Metro and 2,600 other newspapers, magazines and websites do not believe the Press can be truly free under rules imposed by politicians. We belong to a regulator which is entirely independent of the Government. Chaired by former Appeal Court Judge Sir Alan Moses, the Independent Press Standards Organisation
