Monopoly
A firm that has no competitors in its industry is called a monopoly. Monopolies are much maligned because their profit incentive leads them to raise prices and lower output in order to squeeze more money out of consumers. As a result, governments typically go out of their way to break up monopolies and replace them with competitive industries that generate lower prices and higher output. At the same time, however, governments also very intentionally create monopolies in other situations. For instance, governments issue **patents**, which give monopoly rights to inventors to sell and market their inventions. Similarly, in many places, local services such as natural gas delivery and trash collection are also monopolies created and enforced by local government.

12. Which of the following is TRUE about monopoly?

1. It is good for consumers
2. High price and less choice
3. The competitive rate is high.
4. Government supports its benefit
5. The company always offers promotions.

Faces

People that I meet and pass
In the city’s broken roar,
Faces that I lose so soon
And never found before,

Do you know how much you tell
In the meeting of our eyes,
How ashamed I am, and sad
To have pierced your poor disguise?

Secrets rushing without sound
Crying from your hiding places
Let me go, I cannot bear
The sorrow of the passing faces.

People in the restless street,
Can it be, oh, can it be
In the meeting of our eyes
That you know as much of me?

Black Friday

Today, Black Friday is well known in the United States as the day after Thanksgiving, when stores have big sales to jump start the holiday shopping season. Have you ever wondered why the day is referred to as "Black Friday?"

You may have heard that the name has to do with two bookkeeping expressions. Being "in the black" means that a store is operating at a profit. Being "in the red" means that a store is operating at a loss. The supposed reason for calling the day after Thanksgiving Black Friday was that after operating at a loss for most of the year, the beginning of the Christmas shopping season brought most retail business back **"into the black."** It makes for a good and reasonable story; but it doesn't happen to be true.

The term "Black Friday" originally referred to the day the U.S. gold market crashed on Friday September 24th, 1869, after a period of speculation by two unscrupulous financiers. Apart from the fact that this Black Friday too, had to do with money, the two things are not related.

The real history of Black Friday began in the city of Philadelphia in the 1950s, where the Army-Navy football game was held every year on the Saturday after Thanksgiving. Beginning on Friday, the city would swell with shoppers, tourists, and sports fans. It was a grueling weekend for the Philadelphia police department, requiring extra- long shifts to manage the crowds, and traffic, and the increased instances of opportunistic crime. It was because of these difficulties that the Philadelphia police dubbed the day "Black Friday."

By 1961, the term was well-known in Philadelphia. An effort was made in the early 1960s to change the term to "Big Friday" to emphasize the positive (i.e., profitable) aspects of the weekend, but the proposed change did not catch on. Black Friday remained a relatively local event well into the mid-nineteen-eighties. At this time, retailers across the country, who wanted to promote the day after Thanksgiving as a day devoted to shopping, invented the lighter, more positive "out of the red, into the black" origin story described above. Today, the myth is fairly well known, and its association with chaos and crime in Philadelphia has been all but forgotten.

5. To promote Thanksgiving Day

History of Soccer

The oldest soccer-like sport was played over 2,000 years ago in ancient Chinese, Greek, and Roman cultures. A rock sometimes served as the ball. In some instances, a "ball" was made from an animal hide stuffed with hair. In its current form, though, soccer evolved from 19th century England and was brought to the United States by immigrants.

England's first football association was created in 1863, which is when the sport began to become standardized. The association established rules which continued to evolve. One of those rules, that the ball could not be carried by hand, resulted in the official separation between the sports of soccer and rugby.

Increasing industrialization made soccer more and more popular in England. While it had originally been played largely by public school teams, workplace-based teams began to emerge in the 1900s. Talented players were paid, and as a result of workplace- team matches, soccer became a revenue-generating spectator sport.

The first professional soccer league was the English Football League. Semi-professional leagues were introduced in Germany in 1949, and the first professional German division began in 1963/64. While the first American soccer leagues used the term "football" for the sport like their European **counterparts**, they switched to the term "soccer" in the late 1910s and early 1920s to avoid confusion between soccer and the American game also (and still) called football. The first U.S. professional soccer leagues formed in 1967: the United Soccer Association and the National Professional Soccer League. These soon merged to create the North American Soccer League in 1968. Soccer's popularity continued to increase in the United States, and in 1994, the U.S. hosted the 1994 FIFA World Cup. Major League Soccer in the U.S. was established in 1996.
