Part I: Expression (Items 1 – 10)
Choose the best answer.

Situation: Science experiment in laboratory

Teacher: Today, we'll conduct an experiment_____(1)_____light intensity affects photosynthesis in plants. Can anyone explain why we use a water plant like Elodea for this experiment?

Student 1: Is it because Elodea releases visible oxygen bubbles during photosynthesis, making it easier to observe the process?

Teacher: _____(2)_____! Now, what variable should we change to test light intensity's effect on photosynthesis?

Student 2: We can vary the distance of the light source from the plant while keeping everything else constant, like temperature and water composition.

Teacher: Great idea! After setting up, _____(3)_____count the bubbles produced per minute and record the data carefully.

1. 1. to testify what 2. to investigate how 3. to verify if 4. to wonder when 5. to bring about

Thai History

Thailand, formerly known as Siam, has a rich and vibrant history that dates back thousands of years. It is the only Southeast Asian country that was never seized by the Western powers, earning it the nickname "Land of the Free." The kingdom's roots can be traced to the Sukhothai period in the 13th century, which was the commencement of the early development of the nation. During this era, King Ramkhamhaeng introduced a valuable legacy, which remains the foundation of the written language today, called the Thai script.

The Sukhothai period was followed by the Ayutthaya period, which lasted over 400 years. Ayutthaya became a major trading hub, attracting merchants from as far as Europe and the Middle East. This period saw the flourishing of art, culture, and architecture. However, in 1767, Ayutthaya surrendered to Burmese forces, leading to the rise of the Thonburi and later the Rattanakosin periods, which shaped modern-day Thailand.

Today, Thailand is known for its blend of ancient traditions and modern development. Its historical landmarks, such as the Grand Palace and ancient temples, attract millions of visitors each year.

The Basics of Economics

Economics is the study of how individuals, businesses, and governments make decisions about the allocation of limited resources. It is often divided into two main branches: microeconomics and macroeconomics. Microeconomics concentrates on the patterns of individuals and businesses, exploring how they make choices about what to produce, buy, or sell. On the other hand, macroeconomics looks at the economy as a whole, examining topics like inflation, unemployment, and national income.

A key concept in economics is scarcity, which refers to the fact that resources are limited, but human wants are unlimited. For example, there is only so much land, labor, and raw materials available to produce goods and services. Because of this, choices must be made, leading to the concept of opportunity cost. Opportunity cost is the value of the next best alternative that must be given up when making a decision. For instance, if a government decides to spend money on creating one project, it may have to give up funding for other projects.

Markets play a crucial role in economics by bringing buyers and sellers together to exchange goods and services. Prices in markets are determined by supply and demand. When demand for a product increases and supply remains unchanged, prices typically rise. Conversely, when supply increases and demand stays the same, prices often fall. Understanding these principles helps economists predict how changes in policies or global events will affect economies.

18. What is the primary focus of microeconomics?

1. Inflation and unemployment
2. National income
3. International trade
4. Patterns of individual's businesses
5. Behavior of individuals and businesses

19. What is a scenario of opportunity cost?

1. The rising price of goods due to increased demand
2. The expenses of government on something new
3. Increasing the supply of products in the market
4. A decrease in unemployment rates
5. Choosing to building new schools instead of funding road improvements

20. What happens when demand increases and supply remains unchanged?

1. Prices fall 2. Prices rise 3. Demand decreases 4. Supply increases 5. Same price

A Heart's Whisper

In the still of the night, my heart takes flight,
A whisper of love, soft and light.
The moon above, a glowing flame,
Carving your name in its gentle frame.

Your smile, a spark, ignites my soul,
A fleeting glimpse, yet makes me whole.
The stars align to light our way,
In your embrace, I long to stay.
